

ABSTRACT

Topic: Online Grocery Shopping

Project Nature: Mini Project Extension

Completion Level: 60 % of Mini Project

Online grocery shopping allows customers to buy groceries online. This software is supported to eliminate and in some cases reduce the hardships faced by the existing system. In the current system users have to visit grocery mart to purchase products .Current system is time consuming and less convenient .The advantage of this system is users does not have to wait in long queue and does not have to struggle with trolleys. User can purchase the products from anywhere at any time. No formal knowledge needed to use this.

Customers can purchase items from the comfort of their own homes or work place. Shopping is made easier and convenient for the customer through internet. Consumers will be able to browse and search products under different categories .Selected products can be added to the shopping cart, which can be managed by customer .Once they Submit the order it will be delivered to them .Users can track the products they ordered .This System accepts all kinds of payments such as credit cards, debit cards, UPI and all major mobile wallets. The Admin can manage information about Grocery, Users and product.Admin can also track the orders and stock.
